DETAILED ACTION

1. This application was filed with an Application Data Sheet indicating that correspondence was to be mailed to customer number 23539 [corresponding to David Meeks] although there is no power of attorney in the file. An office action was mailed to David Meeks on 8/12/2004; that office action set a period for reply of 3 months. No reply was received within that period, so on 3/21/2005, a notice of abandonment was mailed to David Meeks.

The Patent office has since been notified that the applicant did not receive any correspondence addressed to David Meeks, the abandonment has been rescinded, and a copy of the 8/12/2004 office action can be found below; the period for reply is 3 months from the date of mailing of this office action. Further correspondence will be mailed to Paul Meeks.

2. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication

is for sale by the Superintendent of Documents, U.S. Government Printing Office,
Washington, D.C. 20402.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kalnitz
(United States Patent number 2,369,464).

Art Unit: 3673

Kalnitz shows a boat barrier device comprising a vertical support (13) and a watercraft barricade means (14).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nixon, et al. (United States Patent number 6,681,709).

Nixon shows a boat barrier device comprising a vertical support (34,36,38) and a watercraft barricade means (24).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Newhall and Hescok (United States Patent number 1,151,607); and Clark (United States Patent number 4,738,563) show similar barriers.

NEW CENTRAL FAX NUMBER

Effective July 15, 2005

On July 15, 2005, the Central FAX Number will change to **571-273-8300**. This new Central FAX Number is the result of relocating the Central FAX server to the Office's Alexandria, Virginia campus.

Most facsimile-transmitted patent application related correspondence is required to be sent to the Central FAX Number. To give customers time to adjust to the new Central FAX Number, faxes sent to the old number (703-872-9306) will be routed to the new number until September 15, 2005. After September 15, 2005, the old number will no longer be in service and **571-273-8300** will be the only facsimile number recognized for “centralized delivery”.

CENTRALIZED DELIVERY POLICY: For patent related correspondence, hand carry deliveries must be made to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314), and facsimile transmissions must be sent to the Central FAX number, unless an exception applies. For example, if the examiner has rejected claims in a regular U.S. patent application, and the reply to the examiner’s Office action is desired to be transmitted by facsimile rather than mailed, the reply must be sent to the Central FAX Number.
